International Specialists in the Environment

### EXECUTIVE SUMMARY

Name Unreported  
Address Unreported  
Chicago, Illinois 60627

ILD980678007

This site was originally identified to the U.S. EPA through the Eckhart Report. The Zip Code is the only information known about this site. Since the area is heavily industrialized a name and address is needed before the site can be located. Until the location is found, no further action is recommended and due to the ambiguity of this site it is also recommended that it be removed from the CERLA/HRS site list.

# Eckhardt Report

site through 1978 was reported as 2 hundred tons. Chemical components of waste disposed at this site include acid solutions (with pH 3) and heavy metals and trace metals (bonded organically and inorganically). Methods of disposal include pits, ponds and lagoons.

West Chicago, 258 Anna Street

Site is located on property of chemical plant participating in survey and is known to have been used for disposal from 1932 to 1973. Site is no longer in use. Amount of chemical process waste disposed of at this site through 1978 was reported as 550 hundred tons. Chemical components of waste disposed at this site include acid solutions (with pH 3), heavy metals and trace metals (bonded organically and inorganically), radioactive residues (with over 50 pico-curies per gram), organics and inorganics. Methods of disposal include mixed industrial waste landfill, drummed waste landfill, pits, ponds and lagoons and incineration.

Identified as Kerr McGee Chem. Corp., W. Chicago Plant, 258 Anna St., W. Chicago, Illinois 60185. Closed in 1974. Had a number of lagoons, ponds, and pits. SIA rated. WPC has file with contamination assessment.

42

Name Unreported, Address Unreported 60627

Site is not located on property of chemical plant participating in survey, but is known to have been used for disposal during 1967. At time of use, site was owned by private concern other than chemical company included in this survey. Site is still being used. Chemical components of waste disposed at this site include acid solutions (with pH 3), heavy metals and trace metals (bonded organically and inorganically) and radioactive residues (with over 50 pico-curies per gram). Methods of disposal include mono industrial waste landfill, landfill in which municipal waste is co-disposed, pits, ponds and lagoons, incineration and reprocessing and/or recycling.

From zip code all we can determine is that site is in Chicago.
